

Ashton Aschenbrener

FULL-STACK AI ENGINEER

California / Remote • sixscripts@proton.me • github.com/sixscripts-ai • linkedin.com/in/aaschenbrener

SUMMARY

Full-stack AI engineer focused on retrieval systems, agentic workflows, and product interfaces with Next.js, TypeScript, Python, and Postgres.

PROJECTS

- ▶ Built GhostSSH, an agentic job-search workflow that extracts candidate evidence from GitHub, LinkedIn, and portfolio data, then ranks roles through structured matching logic.
- ▶ Designed ICT Knowledge Engine, an ontology-backed retrieval system that connects financial concepts, semantic search, and graph-based exploration.
- ▶ Built Campus Compass, a campus information assistant with semantic course search, source-aware retrieval, and prerequisite graph navigation.
- ▶ Developed Agentix, a multi-location inventory intelligence concept with reorder workflows, trend visualization, and integration-ready data modeling.
- ▶ Built Webhook Replay Lab, a backend reliability tool that stores, audits, and replays webhook deliveries with per-attempt history.

EXPERIENCE

Founder & Engineer • Six Scripts Software (Independent)

2024 - Present

- ▶ Ship full-stack AI products end-to-end: product, UI, backend, data model, AI workflow, verification.
- ▶ Designed retrieval and agent systems with explicit failure handling and eval harnesses.
- ▶ Owned production deploys on Vercel with Postgres + pgvector backends.

AI Engineering Student • MiraCosta College

2024 - Present

- ▶ Coursework in AI systems, data structures, and applied software engineering.
- ▶ Independent work on retrieval, agents, and ontology-backed knowledge engines.

SKILLS

Languages:	TypeScript, Python, SQL, JavaScript
Frontend:	Next.js, React, Tailwind, Framer Motion
Backend & Data:	Node.js, Postgres, pgvector, route handlers, server actions
AI:	RAG, agentic workflows, tool orchestration, evals, knowledge graphs
Infra:	Vercel, GitHub Actions, Docker basics
